

Questions:

What asset or model are you eager to get into the capstone?

Answer:

I am excited to work on some of the items within the environment, as well as concepting more things as we go, one of the things I am most proud of so far is the notebook model, while it may not be very large, but I feel it looks good, and I had fun doing it. as well as I have enjoyed the documentation I have done.

Question:

What are you excited about on the horizon (post graduation)? Has the focus of this excitement changed since starting your program?

Answer:

I am excited to get into some work at a company, as well as doing some personal projects and working towards opening a studio some day, I have always dreamed about making videogames, so this is a big thing for me. Certain aspects of this have changed, I found myself liking some aspects more then others such as animation which I found enjoying more then I had anticipated. Overall, I am excited, nervous and hopeful things will turn out well.
